HOLLAND BULBS. WE GROW OUR OWN.

When patronising our firm, you are assured of a highly specialised service, rendered by experts, giving you advice in regards to the growing of Bulbs and also supply you with a proper planting plan, so that, regardless of location or soil conditions, maximum results may be attained.

Above all, however, you are assured of excellent quality, grown on our own nursery at Noordwijk, Holland, harvested, graded and packed by our own men, under our personal supervision. In other words, at no time do we depend upon some one else to look after the interests of our clients and the work is done at all times by men, whose families have been in this business for generations.

Under those circumstances we take little risk in guaranteeing our bulbs to be **true to name**, the best nature produces and we offer to **replace gratis any bulb** purchased from us, which does not produce a good bloom under ordinary care.

The prices of all bulbs in this catalog are for finest selected stock and include all charges, except those for packing and delivery by express or parcel post from Stamford, Conn. or New York and for our Pacific Coast clientele from San Francisco, California.

Inquiries for catalogs, etc., orders and payments to be addressed to us in Stamford, Conn. Personal checks are always acceptable. Orders for less than \$ 10.00 should be accompanied by cash.

Collective orders for Garden Clubs are invited and lectures on any type of bulbs are given free of charge.

We do not carry stocks in America and therefor recommend early ordering, before September first, to avoid disappointment.

All names of tulip and narcissus varieties listed in this catalog, are in accordance with the list, compiled by the Royal Horticultural Society in conjunction with the Holland Bulbgrowers Association.

The names printed in heavy types are those of outstanding varieties or novelties.

Daffodils for Naturalizing

Our mixtures are especially made up from named varieties and are greatly superior to the cheap mixtures frequently sold; we have selected such varieties as are especially adapted for naturalizing. They may be relied upon to give an abundant supply of flowers over a long period.

Whereever Massplantings of Narcissi are contemplated the following inexpensive mixtures give maximum results and are highly recommended.

Flower Border and Naturalizing Mixture. A superior mixture of yellow, bicolor and white trumpets, showy varieties of Barrii, Incomparabilis and Leedsii, Jonquils and Poeticus for grouping in the flower border. An ideal cutflower mixture.
\$ 55.00 per thousand.

Seedling Yellow Trumpets Mixed. All pure golden-yellow trumpets of the King Alfred, Minister Talma group. \$ 50.00 per thousand.

Seedling White Trumpets Mixed. Made up from hybrids of Peter Barr, Madam de Graaff and many others. \$ 65.00 per thousand.

Seedling Bicolor Trumpets Mixed. Choice hybrids of the Spring Glory and Victoria class. \$ 55.00 per thousand.

Seedling Red Cupped Varieties Mixed. A most attractive mixture made up from Barrii, Incomparabilis and other short cupped groups. \$ 65.00 per thousand.

Seedling Bunch Flowered Varieties Mixed. Made up from Poetaz, Polyanthus and Jonquil groups. \$ 65.00 per thousand.

Standard Mixture. All yellow, all white, or all varieties mixed.
\$ 40.00 per thousand.

We are prepared to make up mixtures to suit the taste of our clients, keeping the different types separate, so that they may be planted out separately. The varieties in each mixture have been selected so as to give continuous flowering for a month or more.

Our clients may avail themselves of our special landscape service, including blue prints, planting plans and supervision for attractive and natural Daffodil plantings.

Narcissi.

Yellow Trumpet Daffodils.

Trumpet as long or longer than perianth segments; trumpet lemon-yellow or sulphur-yellow, with perianth of same shade.

In view of pending legislation the Narcissi prices are provisional and subject to revision.

All prices are for heavy double-nosed bulbs only.

AEROLITE. Perianth lemon-yellow, petals overlapping, trumpet slightly darker, frilled. Beautiful Daffodil of great substance.

\$ 2.10 for 10, \$ 18.50 per 100.

ALASKA. Giant flower of deepest gold; more graceful than most of the giant Ajax varieties, as the trumpet is deeply frilled and recurved.

\$ 4.00 for 10, \$ 35.00 per 100.

BEN HUR. A glorious "loud speaker" trumpet, deeply frilled of pure Roman gold, 2½ inches across at the mouth; in spite of its immense size the whole flower is finely proportioned, one of the best of the new giants trumpets.

\$ 0.85 each, \$ 6.00 for 10.

DIOTIMA. Considered by many experts as the very best of the new super-giant yellow trumpets; despite its huge size (perianth-being five to six inches across) the whole flower is beautifully proportioned and is carried graceful on flattened tapering stems, two feet tall, entirely free from the amaryllis-like stiffness of many of the giant trumpets; the broad overlapping petals forms a star-shaped perianth of medium deep primrose, trumpet somewhat more deeply colored, undoubtedly one of the top-notchers for many years to come.

\$ 2.50 each, \$ 22.50 for 10.

EMPEROR. Perianth primrose, trumpet darker, a forcing and bedding flower of proven merits.

\$ 1.20 for 10, \$ 8.50 per 100.

FANTIN LATOUR. Very deep golden yellow throughout, an immense bloom, excellent for exhibition; medium early. \$ 4.00 each.

GOLDEN SPUR. Uniform yellow; the most popular forcing daffodil.
\$ 1.20 for 10, \$ 9.00 per 100.

KING ALFRED. One of the finest of all yellow trumpets. Excellent early forcing variety.
\$ 1.75 for 10, \$ 15.00 per 100.

MINIMUS. The smallest and dwarfest of all Trumpet Daffodils, producing outdoors in February dainty little trumpet flowers of elegant form, rich full yellow, height 3 inches. It likes a peaty soil and may be naturalized in rock gardens or in grass, or grown in pots or pans for the Alpine house, no manure should be given.
\$ 4.00 for 10, \$ 35.00 per 100.

MINOR. A most graceful and charming very early-flowering miniature daffodil of Maximus form, flowers with full yellow perianth gracefully twisted, the miniature trumpet being elegantly flanged at mouth, height 6 inches. This is one of the most scarce little daffodils and our stock is very limited.
\$ 4.00 for 10, \$ 35.00 per 100.

NANUS. A charming variety, a miniature yellow trumpet daffodil, larger than Minimus but smaller than Minor, flowers rich full yellow, very dwarf and early, a gem for the rock garden and for naturalizing on grassy banks, height 4½ inches.
\$ 4.50 for 10, \$ 40.00 per 100.

OLYMPIA. A much improved and enlarged Emperor, free-flowering and hardy.
\$ 1.60 for 10, \$ 14.00 per 100.

TRESSERVE. One of the leaders among the new giant trumpets; deep canary yellow with a paler perianth, the segments of which reach forward about the trumpet, producing a flower of distinct individuality; the trumpet mouth, 2 inches across, is deeply lacinated.
\$ 1.25 for 10, \$ 10.00 per 100.

VAN WAVEREN'S GIANT. Enormous flower with deep yellow trumpet, well opened; perianth pale yellow with outer petals exceptionally broad and inner ones usually slightly twisted, making the flower more graceful.
\$ 2.10 for 10, \$ 18.00 per 100.

WARWICK. Another of the striking King Alfred seedlings outstanding in every way and very early, refined stem and neck bearing a star-shaped perianth of great substance; golden yellow, with trumpet a shade deeper in color.
\$ 2.10 for 10, \$ 18.00 per 100.

ARIZONA. A seedling of the internationally famous Gallipoli, with better neck, staryshaped perianth with broad creamy yellow reflexed petals, and cup of chrome yellow shading to blood orange unusual and beautiful. \$ 4.00 each.

\$ 1.75 for 10, \$ 12.00 per 100.

DICK WELLBAND. One of our finest introductions, very strong grower and exceptionally free-flowering. The perianth is pure white and the cup flame orange. One of its most remarkable qualities is that the color does not fade, but rather intensifies with age. The flower lasts unusually long and we believe that this variety will be of the greatest value both for greenhouse work or for outside. Its great beauty lies in the startling contrast between petals and cup which makes it stand out in the largest collections of daffodils. A worthy companion to Francisca Drake.
\$ 1.25 each, \$ 10.00 for 10.

FORTUNE. Broad creamy yellow perianth of very solid texture, crown of great size and elegant form, opening at mouth and beautifully frilled, of a glowing soft orange. A Giant Incomparabilis of perfect form, early, a strong grower. Undoubtedly will soon become one of the more popular varieties. See picture on cover.
\$ 8.00 each.

FRANCISCA DRAKE. It is impossible to describe adequately the beauty of this unusual flower of a distinct new type; the pure white perianth petals are of unusual substance; an inch and a half wide, and tinted gold at the base, which shows through on the outside; the cup, wide and deep, is golden yellow at the base, changing gradually to flame orange at the densely frilled edge; the flowers are held well above the fine foliage and give the effect of a flock of white seagulls taking flight; strong-growing and very free-flowering.
\$ 5.00 for 10, \$ 45.00 per 100.

GALOPIN. An outstanding exhibition variety that should be included in every collection. The broad overlapping petals are of purest white with a deep orange-red cup. The flowers are of large size and carried on tall, strong stems.
\$ 2.00 each.

HELIOS. Deep golden yellow perianth, semi-overlapping; the cup opens a little darker than the petals and in a cool climate gradually changes to light orange. \$ 1.50 for 10, \$ 12.50 per 100.

JOHN EVELYN. Deservedly an international favorite; outstanding among the new Incomparabilis hybrids; flatly opening perianth, 4 to 5 inches across, with a flat cup nearly 2 inches in diameter, densely frilled, the perianth being pure white without trace of shading, and the cup lemon-yellow and fluted or shirred to the base, good neck, strong grower, free-flowering and a good propagator; one of the greatest daffodils of the present day and for years to come.
\$ 2.10 for 10, \$ 18.00 per 100.

LOUD SPEAKER. Among all the fine daffodils of recent introduction, no other has more quickly made a name for itself; a flower of great size, 4½ inches across, with wide flaring trumpet 2 inches across, the whole flower being finely proportioned, and borne on a tall stem with a good neck, in color the perianth is pure citron yellow, and the cup chrome yellow, deepening slightly at the frilled edge, conspicuous styles of the same shade as the perianth add to its beauty, outstanding and in every way a satisfactory, as well as a sensational flower, both in the garden and on the show table.
\$ 10.00 each.

LUCINIUS. A self-colored golden yellow flower of unusually good form and excellent substance. A very distinct type which should be of especial value to hybridizers.

\$ 1.50 for 10, \$ 12.50 per 100.

MILFORD HAVEN. Fine flower with cream-white perianth and wide cup ruffled and deeply frilled at edge, chrome yellow at base and shading into rich orange-scarlet, the same gorgeous color combination as in the Montbretia, "His Majesty".

\$ 3.00 for 10, \$ 27.50 per 100.

ORANGE GLOW. Yellow perianth, of good substance, flaring trumpet yellow with orange glow, rather frilled at edge.

\$ 2.00 each.

RED CROSS. Famous throughout the daffodil world, extra large, strong flower, opening flat, primrose yellow perianth, and deep yellow cup densely frilled, of deep orange, substantial and long lasting and fine both in the garden and for exhibition.

\$ 2.50 for 10, \$ 22.50 per 100.

SALEMBO. Perianth with extra broad petals forming a double triangle; each petal tipped with tiny spur; perianth very nearly 4 inches across with cup an inch and a half; pure even yellow-orange; vigorous grower; very tall; good neck; fine for exhibition.

\$ 0.90 for 10, \$ 6.00 per 100.

BRILLIANCY. A conspicuous seedling, 4 inches across, informal star-shaped perianth of pale primrose, with deep, broad, yellow cup, picoteed red-orange at the very edge.

\$ 1.75 for 10, \$ 15.00 per 100.

DOSORIS. Pure white overlapping perianth, flat cup, finely frilled, of red-orange.

\$ 0.90 for 10, \$ 6.00 per 100.

\$ 6.00 each.

SEAGULL. Large broad petaled perianth, slightly reflexed pure white, giving an effect suggestive of the name as the flowers seem to float above the foliage, cup light yellow, with red picotee edge, free-flowering, extremely tall, late, fine for naturalizing.
\$ 0.90 for 10, \$ 7.00 per 100.

Triumph Tulips.

With all due respect to the old Single and Double Early Tulips, it is now generally accepted, that the Triumph Tulips, with their much longer stems, very much sturdier growth and substance, are far better adapted to the American climate, therefor will last longer outside and also for early forcing give more satisfactory results.

The Triumph Tulips originate from crossing Single and Double Early Tulips with Darwin Tulips, which gave them the form and habits of the Darwin Tulips and they flower at the same time as the Early Tulips.

Dutch Exhibition Hyacinths.

These consist of the largest and finest selected bulbs of the Dutch Hyacinths and are best used for potwork. After they have been dried and stored in a cool place, they should be potted up in a light sandy soil; do not use new pots, unless they have been soaked for some time. Before plunging them in a cool spot, the ground should be soaked; a layer of sand on top of the pots, to prevent damaging the crowns, when removing the pots during frost, is advisable. When bringing them in the greenhouse, keep the bulbs in subdued light, until the bud is sufficiently grown out of the bulb; temperature about 70 F., a little lower when the flower is visible.

Selected large bulbs, such as offered in this catalog, will succeed best for early forcing; they should be potted up immediately in deep pots, 1½ inches apart, whereby most any clean soil may be used; a little decomposed manure, thoroughly mixed will help, in case the soil is very poor. Water soil before potting, because Iris never start in dry soil. Plunge pots outside, bringing them in the greenhouse around November 15th., keeping them cool. Iris do not stand a high temperature. As soon as the buds are palpable, the temperature may be increased gradually until they are ready. Be sure to water frequently.
